

Animals / Jungle: Tigers

Activity 1: Listening

Welcome to a practice listening for the GESE 1 about jungle animals.

You are going to hear a talk about **Tigers**. You will hear the talk twice. As you listen, **write the missing information**. Are you ready?

Audio Script

Tigers are **big** jungle animals. They are **white**, **orange** and have **black** stripes. Tigers usually have **yellow** eyes. Tigers have **long** tails and **sharp** claws. They also have **four** legs and a **large** head. Tigers like to eat **meat** and are good hunters. A male is called a tiger, a female is called a tigress and a baby is called a cub.

Now let's look at the text with the correct answers.

This is the end of the listening task.

Marks: +_ / +10

NOTE:

→ This is a good listening activity to work on adjectives, like “big”, “long”, “sharp” and “large”, numbers and colours. Also, the noun “meat” in order to allow the student to gain practice in the vocabulary of the natural environment when it comes to animal food sources.

→ You may have to play this listening more than two times to allow the students to get used to collecting the information.

→ Apart from that, it is fine after putting it on between 4 to 6 times, to play and stop the listening activity, while writing the answers and having the students write the answers.

→ It is also a good idea to say the sentence with emphasis on the answer a couple of times in order to allow the student to hear and make sense of the sounds and sentence structure.

→ If you are able to translate it into their native language, you can do this by simultaneous translation, but only once or twice, so that the student knows what they are listening too. It is to the listeners advantage that they hear this as many times as possible in English while developing their listening skill.
